## *Why our rehabilitation program will benefit you:*

- Because you need to **regain your strength** and **stamina** after a short-term hospitalization, a decline in your health status, or an exacerbation of an ongoing health issue
- Our therapy staff of **Physical, Occupational, Speech Language,** and **Respiratory Therapists** will provide you with a screening and then the development of a therapy plan of care
- While you are with us, our discharge planning and case management team will **assess your needs** and **educate** you about available resources in the community. All with your success in mind!
- Let our staff who work with Medicare, Medicare Replacement plans, Medi-Gap and other insurances, including Long Term Care Insurance provide you with a **financial review** of your insurance situation
- Because of the care and support of our nurses and therapists, we give you the best chance to **successfully return** to where you were living before hospitalization
- We will work with you and your family to develop a **plan for care for your return to home**. We'll even make the referral to a community resource for you
